Wall Anchors

Stainless Post Barrels

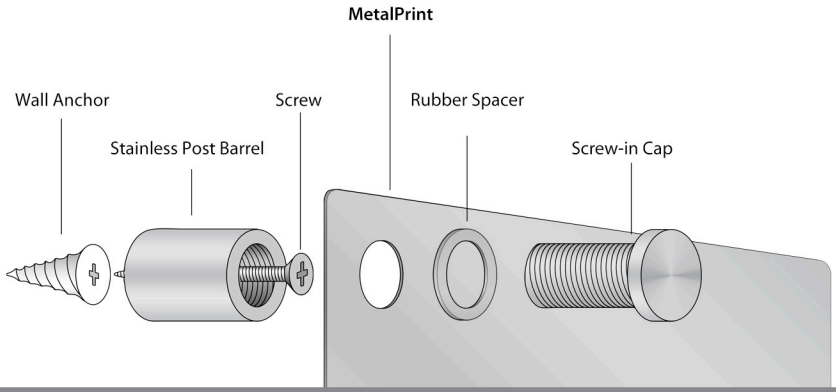

Screws

Rubber Spacers

Screw-in Caps

Tools You May Need

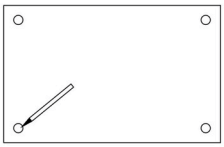

- Level
- Pencil
- Drill with 3/16" Bit
- Philips Screwdriver

Installation Instructions

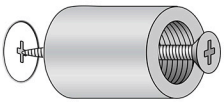

Mounting Stainless Posts

Step 1: Using a level, place your Metal-Print against the wall in desired location and trace the four holes with a pencil.

Step 2: Drill pilot holes in the center of each circle and insert wall anchors. We recommend a 3/16" drill bit.

Step 3: Using a Philips screwdriver, insert the included screws through the Stainless Post barrels and into the wall anchors.

Step 4: Place your MetalPrint against the Stainless Post barrels, place the rubber spacers in front of the MetalPrint and insert the screw caps through the holes into the barrels. Hand tighten to secure the print.
